

ZCILDEL - Custom Electronic Claim Delete

This program is designed to delete all file entries for selected electronic claim batch reference numbers. When a batch / reference is selected for deletion, the following files will have records for the claim and batch deleted from them.

ecsaud, ecsaut, ecsclm, escsmt, escsob, escsov, ecsdme, ecsdup, ecseap, ecsemp, ecserr, ecsetx, ecshdr, esclin, ecsprv, ecsptr and ecsbf

If all references for a batch have been deleted, the batch will also be deleted from ecsbat.

Unlike the standard CBD program, ZCILDEL

allows the user to delete claims from batches that have not been entirely completed.

offers more selection criteria.

deletes records from more files.

Deleted records are NOT archived so it is highly recommend that a backup of the files listed above be made prior to the execution of this program.

At any menu, enter **zcildel** to begin the program.
